“Invention, Innovation, Entrepreneurship, 3D Printing”

Presented by

Mr. Charles Hull

Co-Founder and Chief Technology Officer, 3D Systems

ABSTRACT: The origin of 3D printing will be discussed, along with a brief history of the innovations and entrepreneurship to bring the early 3D printing applications to market. Then current trends will be addressed, with an emphasis on both healthcare and on implementing 3D printing in production.

Charles Hull is the inventor of the solid imaging process known as stereolithography, the first commercial 3D printing technology. With the founding of 3D Systems in 1986 he initiated the 3D printing industry and continues to lead it today with cutting edge innovations in state of the art production 3D printers that are changing the game of manufacturing. He is a named inventor on 85 United States patents, plus other patents around the world, in the fields of ion optics and 3D printing.

Mr. Hull received a BS in engineering physics from the University of Colorado in 1961, and an honorary Doctorate in Engineering from Loughborough University in the U.K. in 2005, and an honorary Doctorate in Science from the University of Colorado in 2016.

USC Radisson Hotel, Center Ballroom

3540 South Figueroa Street Los Angeles, CA 90007

Seminar begins at 3:30pm

Reception to follow afterwards in the Galleria
