

Curriculum Vitae of Mihailo R. Jovanović

Ming Hsieh Department of Electrical and Computer Engineering
University of Southern California
3740 McClintock Avenue, Los Angeles, CA 90089-2563

+1-213-740-4474
mihailo@usc.edu
viterbi-web.usc.edu/~mihailo/

Appointments

Professor of Electrical and Computer Engineering-Systems.

University of Southern California, Jan. 2017 – present.

Professor of Aerospace and Mechanical Engineering.

University of Southern California, Aug. 2017 – present.

(by courtesy)

Founding Director of the Center for Systems and Control.

University of Southern California, Jan. 2017 – present.

Adjunct Professor of Electrical and Computer Engineering.

University of Minnesota, Jan. 2017 – present.

Professor of Electrical and Computer Engineering.

University of Minnesota, Aug. 2016 – Jan. 2017.

Associate Professor of Electrical and Computer Engineering.

University of Minnesota, Aug. 2011 – Aug. 2016.

Assistant Professor of Electrical and Computer Engineering.

University of Minnesota, Dec. 2004 – Aug. 2011.

Graduate Faculty.

Aerospace Engineering and Mechanics, University of Minnesota, Sept. 2015 – Jan. 2017.

Control Science and Dynamical Systems, University of Minnesota, Sept. 2005 – Jan. 2017.

Postdoctoral Scholar.

Department of Mechanics, Royal Institute of Technology, Stockholm, Sweden, Sept. 2004 – Dec. 2004.

Advisor: Professor Dan S. Henningson.

Visiting Appointments

Visiting Professor.

School of Mechanical Engineering.

University of Belgrade, Spring 2021 – present.

Visiting Scientist.

Theory of Reinforcement Learning.

Simons Institute for the Theory of Computing, Aug. 2020 – Dec. 2020.

Long Term Visitor.

IMA Thematic Year on Control Theory and its Applications.

Institute for Mathematics and Its Applications, Sept. 2015 – May 2016.

Visiting Professor.

Center for Turbulence Research.

Stanford University, Jan. 2012 – July 2012.

Long Term Visitor. Institute for Mathematics and Its Applications, Sept. 2009 – June 2010.
IMA Thematic Year on Complex Fluids and Complex Flows.

Visiting Scholar. Department of Automatic Control, Lund University, Feb. 2010.
Focus on Multi-Agent Coordination and Estimation.

Education

PhD in Mechanical Engineering. University of California, Santa Barbara, 2004.
Thesis: *Modeling, analysis, and control of spatially distributed systems.*
Advisor: Professor Bassam Bamieh.

MS in Control Engineering. University of Belgrade, Serbia, 1998.
Thesis: *Practical tracking automatic control of axial piston hydraulic motors.*

Dipl. Ing., Mechanical Engineering. University of Belgrade, Serbia, 1995.
Graduated with First Class Honors, **GPA:** 9.53/10.00.

Awards, Honors, and Recognitions

Fellow Elections

- Fellow of IEEE (Institute of Electrical and Electronics Engineers), Class of 2019.
For contributions to modeling, optimization, and control of large-scale distributed systems.
- Fellow of APS (American Physical Society), Class of 2017.
For profound contributions to stability and flow control, and the application of control-theoretic and optimization techniques to the analysis of wall-bounded shear flows, drag reduction, and viscoelastic fluids.

Early Career Awards

- National Science Foundation CAREER Award, 2007.
- Early Career Award, UMN Initiative for Renewable Energy and the Environment, 2010.

Best Paper Awards

- George S. Axelby Outstanding Paper Award, IEEE Control Systems Society, 2013.
- Finalist, Best Student Paper Award, 2014 American Control Conference (as advisor).
- Finalist, Best Student Paper Award, 2007 American Control Conference (as advisor).

Plenary and Keynote Presentations

- Plenary Speaker, 8th International Congress of the Serbian Society of Mechanics, 2021.
- Plenary Speaker, 8th IFAC Workshop on Distributed Estimation and Control in Networked Systems (NecSys), 2019.
- Semi-plenary Speaker, 2016 European Control Conference.
- Keynote Speaker, 50th Anniversary Celebration, UCSB Mechanical Engineering, 2014.

Other Recognitions

- Distinguished Alumnus Award (Inaugural Class), Dept. of Mechanical Engineering, UCSB, 2014.
In recognition of outstanding research contributions to fluid dynamics, control, and optimization.
- UMN Institute on the Environment Fellow, 2016.
- UMN Informatics Institute Transdisciplinary Faculty Fellow, 2014.
- UMN Institute on the Environment Resident Fellow, 2012.
- Invited Participant (five times), Center for Turbulence Research Summer Program, Stanford University, 2006, 2010, 2012, 2014, 2016.
- Outstanding Reviewer, IEEE Transactions on Automatic Control, 2005.

Student Awards

- The Nicolitch Trust Scholarship – ”for a recipient with exemplary grades and a leadership potential”, 2002 – 2004.
- The Mechanical and Environmental Engineering Department Fellowship, UC Santa Barbara, 1998.
- The Best Student of the Class Award (a class of approximately 500 students)
Department of Mechanical Engineering, University of Belgrade, 1995.
- The Dean’s List, appeared each year during undergraduate studies, 1991 – 1995.
- The Fund for an Open Society Grant, to participate at the FLUCOME’97 conference in Japan, 1997.
- The Ministry of Science & Technology of the Republic of Serbia Fellowship, Jan. 1996 – Jan. 1997.
- The Foundation for Development of Young Researchers of the Republic of Serbia Fellowship, Oct. 1995 – Oct. 1996.
- Energoprojekt Co. Fellowship, Oct. 1994 – Oct. 1995.

Presentations

Plenary and Keynote Presentations

- [PK1] “Robustness of gradient methods for data-driven decision making,” *58th Annual Allerton Conference on Communication, Control, and Computing*, Opening Tutorial Presentation, Monticello, IL, September 2022.
- [PK2] “Color of turbulence: Stochastic dynamical modeling of turbulent flows,” *8th International Congress of the Serbian Society of Mechanics*, Kragujevac, Serbia, June 2021.
- [PK3] “Non-smooth composite optimization: A primal-dual method based on the proximal augmented Lagrangian,” *8th IFAC Workshop on Distributed Estimation and Control in Networked Systems*, Chicago, IL, September 2019.
- [PK4] “Controller architectures: tradeoffs between performance and complexity,” *2016 European Control Conference*, Aalborg, Denmark, July 2016.
- [PK5] “ME, Myself & UCSB,” *50th Anniversary Celebration, Mechanical Engineering Department, University of California at Santa Barbara*, Santa Barbara, CA, October 2014.

Invited Presentations

- [IP1] “Robustness of gradient methods for data-driven decision making,” *Department of Electrical Engineering, Yale University*, New Haven, CT, March 2022.
- [IP2] “Oblique transition in high-speed separated boundary layers,” *Workshop on Wall-Bounded Turbulence: Beyond Current Boundaries, Isaac Newton Institute for Mathematical Sciences*, Cambridge, United Kingdom, March 2022.

- [IP3] “Color of turbulence: Stochastic dynamical modeling of turbulent flows,” *Workshop on Physics-Informed Machine Learning*, University of Southern California, September 2021.
- [IP4] “Convergence and sample complexity of gradient methods for the model-free linear quadratic regulator problem,” *Workshop on Resilient Autonomous Energy Systems, National Renewable Energy Laboratory*, September 2021.
- [IP5] “Convergence and sample complexity of gradient methods for the model-free linear quadratic regulator problem,” *Yahoo Research Seminars*, August 2021.
- [IP6] “Controller architectures: tradeoffs between performance and complexity,” *Workshop on Compressed Sensing and Sparse Representation for Systems and Control*, 59th IEEE Conference on Decision and Control, Jeju Island, Republic of Korea, December 2020.
- [IP7] “Convergence and sample complexity of gradient methods for the model-free linear quadratic regulator problem,” *Workshop on Reinforcement Learning from Batch Data and Simulation*, Simons Institute for the Theory of Computing, Berkeley, CA, December 2020.
- [IP8] “Convergence and sample complexity of gradient methods for the model-free linear quadratic regulator problem,” *Online Seminar on Mathematical Foundations of Data Science*, September 2020.
- [IP9] “Color of turbulence: stochastic dynamical modeling of turbulent flows,” *United Technologies Research Center*, Hartford, CT, June 2020.
- [IP10] “Non-smooth composite optimization: A primal-dual method based on the proximal augmented Lagrangian,” *Automatic Control Laboratory, Swiss Federal Institute of Technology*, Zurich, Switzerland, September 2019.
- [IP11] “First-order optimization algorithms: tradeoffs between robustness and acceleration,” *2019 AFOSR Dynamics and Control Annual Program Review*, Arlington, VA, August 2019.
- [IP12] “Low-complexity modeling and control of turbulent wall-bounded shear flows,” *2019 ARO/AFOSR Joint Program Review*, Colorado Springs, CO, July 2019.
- [IP13] “Modeling, dynamics, and control of wall-bounded shear flows,” *Department of Aerospace Engineering and Engineering Mechanics, University of Texas at Austin*, Austin, TX, May 2019.
- [IP14] “The proximal augmented Lagrangian method for non-smooth composite and distributed optimization,” *Workshop on Innovative Optimization and Control Methods for Highly Distributed Autonomous Systems, National Renewable Energy Laboratory*, Golden, CO, April 2019.
- [IP15] “Input-output analysis and sparsity-promoting optimal control of inter-area oscillations,” *2nd International Conference on Future Electric Power Systems and the Energy Transition*, Champéry, Switzerland, February 2019.
- [IP16] “The proximal augmented Lagrangian method for nonsmooth composite optimization,” *Coordinated Science Laboratory, University of Illinois at Urbana-Champaign*, Urbana-Champaign, IL, October 2018.
- [IP17] “Controller architectures: tradeoffs between performance and complexity,” *Department of Mechanical Engineering, University of California at Riverside*, Riverside, CA, October 2018.
- [IP18] “Optimal sensor and actuator selection in large-scale systems,” *2018 AFOSR Dynamics and Control Annual Program Review*, Arlington, VA, September 2018.

- [IP19] “A primal-dual method for nonsmooth composite and distributed optimization,” *Workshop on Modeling, Prediction, and Design for Complex Networks: A Multi-Disciplinary Perspective*, 2018 American Control Conference, Milwaukee, WI, June 2018.
- [IP20] “The proximal augmented Lagrangian method for nonsmooth and distributed optimization,” *Workshop on Interdisciplinary Approaches for Control of Large-Scale Complex Systems: Latest Development and Future Trends*, 2018 American Control Conference, Milwaukee, WI, June 2018.
- [IP21] “Color of turbulence: stochastic dynamical modeling of turbulent flows,” *Workshop on Research Challenges and Opportunities at the Interface of Machine Learning and Uncertainty Quantification*, University of Southern California, Los Angeles, CA, June 2018.
- [IP22] “A primal-dual method for non-smooth composite and distributed optimization,” *Information Theory and Applications Workshop*, San Diego, CA, February 2018.
- [IP23] “The proximal augmented Lagrangian method for nonsmooth composite optimization,” *Cymer Center for Control Systems and Dynamics, University of California at San Diego*, San Diego, CA, February 2018.
- [IP24] “The proximal augmented Lagrangian method for nonsmooth composite optimization,” *Center for Control, Dynamical Systems and Computation, University of California at Santa Barbara*, Santa Barbara, CA, February 2018.
- [IP25] “Controller architectures: tradeoffs between performance and complexity,” *Department of Electrical and Electronic Engineering, University of Melbourne*, Melbourne, Australia, December 2017.
- [IP26] “Color of turbulence,” *Fluid Mechanics Research Group Seminar, Department of Mechanical Engineering, University of Melbourne*, Melbourne, Australia, December 2017.
- [IP27] “Controlling the onset of turbulence by spatio-temporal oscillations: theory and techniques,” *NSF Acoustics Workshop: New Fundamentals and Applications*, Alexandria, VA, October 2017.
- [IP28] “Controller architectures: tradeoffs between performance and complexity,” *Workshop on Autonomous Energy Grids, National Renewable Energy Laboratory*, Golden, CO, September 2017.
- [IP29] “Optimal sensor and actuator selection in distributed systems,” *Workshop on Sensor Location in Distributed Parameter Systems, Institute for Mathematics and its Applications*, Minneapolis, MN, September 2017.
- [IP30] “A primal-dual method for nonsmooth composite optimization,” *2017 AFOSR Dynamics and Control Annual Program Review*, Arlington, VA, September 2017.
- [IP31] “The proximal augmented Lagrangian method for nonsmooth composite optimization,” *Workshop on Large-Scale and Distributed Optimization, Lund Center for Control of Complex Engineering Systems*, Lund, Sweden, June 2017.
- [IP32] “Controller architectures: tradeoffs between performance and complexity,” *Department of Mechanical and Aerospace Engineering, University of California at Irvine*, Irvine, CA, May 2017.
- [IP33] “Controller architectures: tradeoffs between performance and complexity,” *The Brain-Body Dynamics Lab, University of Southern California*, Los Angeles, CA, April 2017.
- [IP34] “Low-complexity modeling of partially available second-order statistics: theory and an efficient matrix completion algorithm,” *Workshop on Optimization and Inference for Physical Flows on Networks*, Banff, Canada, March 2017.

- [IP35] “Second-order method of multipliers for non-smooth composite optimization,” *Information Theory and Applications Workshop*, San Diego, CA, February 2017.
- [IP36] “Dynamics and control of wall-bounded shear flows,” *Department of Aerospace and Mechanical Engineering, University of Southern California*, Los Angeles, CA, January 2017.
- [IP37] “Color of turbulence,” *GALCIT Colloquium, California Institute of Technology*, Pasadena, CA, January 2017.
- [IP38] “Color of turbulence,” *Workshop on Recurrence, Self-Organization, and the Dynamics of Turbulence, Kavli Institute for Theoretical Physics*, Santa Barbara, CA, January 2017.
- [IP39] “Color of turbulence,” *A Third of a Century in Systems and Control: A Workshop Dedicated to Tryphon Georgiou’s 60th Birthday*, Las Vegas, NV, December 2016.
- [IP40] “Controller architectures: tradeoffs between performance and complexity,” *Workshop on Taxonomies of Interconnected Systems: Large-Scale Networks*, Las Vegas, NV, December 2016.
- [IP41] “Controller architectures: tradeoffs between performance and complexity,” *UTRC Invited Lectures on Control and Dynamical Systems, Institute for Systems Research, University of Maryland*, College Park, MD, November 2016.
- [IP42] “Controller architectures: tradeoffs between performance and complexity,” *CCI-MHI Joint Seminar Series on Cyber Physical Systems, University of Southern California*, Los Angeles, CA, October 2016.
- [IP43] “A second-order proximal method of multipliers algorithm for composite minimization,” *54th Annual Allerton Conference on Communication, Control, and Computing*, Monticello, IL, September 2016.
- [IP44] “Optimal structured decentralized control of positive systems,” *54th Annual Allerton Conference on Communication, Control, and Computing*, Monticello, IL, September 2016.
- [IP45] “Color of turbulence: stochastic dynamical modeling of turbulent flows,” *2016 AFOSR Dynamics and Control Annual Program Review*, Arlington, VA, August 2016.
- [IP46] “Controller architectures: tradeoffs between performance and complexity,” *United Technologies Research Center*, Hartford, CT, June 2016.
- [IP47] “Stochastic dynamical modeling: structured matrix completion of partially available statistics,” *Center for Control, Dynamical Systems and Computation, University of California at Santa Barbara*, Santa Barbara, CA, May 2016.
- [IP48] “Color of turbulence,” *McKeon Research Group, GALCIT, California Institute of Technology*, Pasadena, CA, May 2016.
- [IP49] “Color of turbulence,” *Department of Mechanical Engineering, University of Washington*, Seattle, WA, May 2016.
- [IP50] “Dynamics and control of wall-bounded shear flows,” *Department of Aerospace Engineering, University of Michigan*, Ann Arbor, MI, February 2016.
- [IP51] “Stochastic dynamical modeling: structured matrix completion of partially available statistics,” *Information Theory and Applications Workshop*, San Diego, CA, February 2016.

- [IP52] “Stochastic dynamical modeling: structured matrix completion of partially available statistics,” *Workshop on Optimization and Parsimonious Modeling, Institute for Mathematics and its Applications*, Minneapolis, MN, January 2016.
- [IP53] “Sparsity-promoting dynamic mode decomposition,” *UTRC DMD/Koopman Workshop, United Technologies Research Center*, Hartford, CT, November 2015.
- [IP54] “Dynamics and control of wall-bounded shear flows,” *Symposium on Active Drag Reduction, RWTH Aachen University*, Aachen, Germany, November 2015.
- [IP55] “Sparsity-promoting optimal control of distributed systems,” *Control Group Seminar, University of Oxford*, Oxford, England, November 2015.
- [IP56] “Analysis and control of linear dynamical systems in Chebfun,” *Numerical Analysis Group, University of Oxford*, Oxford, England, November 2015.

Teaching and Curriculum Development

Teaching at the University of Southern California

- Graduate courses

EE 510: <i>Linear Algebra for Engineering</i>	Spring 19
EE 585: <i>Linear Systems Theory</i>	Fall 17, 18, 19, 22
EE 587: <i>Nonlinear and Adaptive Control</i>	Spring 18, 20, 22

Collaborative Efforts and Activities at the University of Southern California

Synchronization of Systems and Control Course Offerings in the Viterbi School of Engineering

Modernization of Control Systems Laboratory

Teaching at the University of Minnesota

- Graduate courses

EE 8215: <i>Nonlinear Systems</i>	Spring 13, 14, 16
EE 8235: <i>Modeling, Dynamics, and Control of Distributed Systems</i>	Spring 07, 09; Fall 11
EE 8250: <i>Adaptive Control</i>	Fall 07
EE 5940: <i>Wind Energy Essentials</i>	Fall 10 – 13
EE 5235: <i>Robust Control System Design</i>	Spring 08
EE 5231: <i>Linear Systems and Optimal Control</i>	Fall 06, 08, 10, 12, 13

- Undergraduate courses

EE 4233: <i>State Space Control System Design</i>	Spring 05, 06, 10, 11
EE 4237: <i>State Space Control Laboratory</i>	Spring 05, 06

EE 4981/4982: <i>Senior Honors Project</i>	Fall 09 – 13, 15; Spring 10 – 14, 16
EE 4951: <i>Senior Design Project</i>	Spring 06, 08, 09, 16
EE 3015: <i>Signals and Systems</i> (Recitation Sessions)	Fall 06 – 13, 16; Spring 10, 13, 16
EE 2002: <i>Introductory Circuits and Electronics Laboratory</i>	Fall 09

Curriculum Development at the University of Minnesota

- EE 8235: *Modeling, Dynamics, and Control of Distributed Systems* (Graduate)
- EE 8250: *Adaptive Control* (Graduate)

Collaborative Efforts and Activities at the University of Minnesota

- Synchronization of Systems and Control Course Offerings in the College of Science and Engineering
- Modernization of Control Systems Laboratory
- Development of Wind Energy Essentials Course

Advising and Mentoring

Graduate Student Activities

Doctoral Student Advisees (Past)

1. Dongsheng Ding, University of Southern California, Aug. 2022.
Thesis: *Provable reinforcement learning for constrained and multi-agent control systems*
Now: *Post-doctoral Fellow, University of Pennsylvania.*
2. Anubhav Dwivedi, University of Minnesota, Aug. 2020.
(jointly with Graham Candler and Joseph Nichols)
Thesis: *Global input-output analysis of flow instabilities in high-speed compressible flows*
Now: *Post-doctoral Fellow, University of Southern California.*
3. Wei Ran, University of Southern California, Aug. 2020.
Thesis: *Modeling and analysis of parallel and spatially-evolving wall-bounded shear flows*
Now: *Assistant Research Scientist, China Aerodynamics Research and Development Center.*
4. Gokul Hariharan, University of Minnesota, April 2020. (jointly with Satish Kumar)
Thesis: *Transition to elastic turbulence in channel flows*
Now: *Research Assistant, Iowa State University.*
5. Sepideh Hassan-Moghaddam, University of Southern California, Oct. 2019.
Thesis: *Analysis, design, and optimization of large-scale networks of dynamical systems*
Now: *Data and Applied Scientist, Microsoft.*
6. Neil Dhingra, University of Minnesota, Dec. 2017.
Thesis: *Optimization and control of large-scale networked systems*
Now: *Business and Program Leader, Orbit Logic.*
7. Armin Zare, University of Minnesota, Dec. 2016.
Thesis: *Low-complexity stochastic modeling of wall-bounded shear flows*
Now: *Assistant Professor, University of Texas, Dallas.*

8. Xiaofan Wu, University of Minnesota, Dec. 2016.
Thesis: *Sparsity-promoting optimal control of power networks*
Now: *Head of Research Group, Autonomous Systems and Control, Siemens Corporate Technology.*
9. Binh Lieu, University of Minnesota, Aug. 2014.
Thesis: *Dynamics and control of Newtonian and viscoelastic fluids*
Now: *Engineering Manager, Apple.*
10. Fu Lin, University of Minnesota, Dec. 2012.
Thesis: *Structure identification and optimal design of large-scale networks of dynamical systems*
Now: *Team Lead, Data Analytics Engineering, Travelers.*
11. Rashad Moarref, University of Minnesota, Dec. 2011.
Thesis: *Model-based control of transitional and turbulent wall-bounded shear flows*
Now: *Senior Backend Engineer, GumGum.*

Doctoral Student Advisees (Current)

1. Hesameddin Mohammadi, ECE PhD Student, Aug. 2017 – present.
Research Area: *Nonconvex control, inference, and optimization problems*
2. Samantha Samuelson, ECE PhD Student, Jan. 2019 – present.
Research Area: *Reinforcement learning and data-driven optimal control*
3. Ibrahim Ozaslan, ECE PhD Student, Aug. 2020 – present.
Research Area: *Optimization-based control*

Doctoral Defense Committee Member (University of Southern California)

| 9. Justin Rice, Delft University of Technology, Delft, Netherlands | Sept. 2010 |

Master's Student Advisees

1. Prashanth Bharadwaj Sivaraman, MSEE Student, Sept. 2015 – July 2016.
2. Harshad Deshmane, MSEE Student, Sept. 2012 – July 2014.
3. Mayur Hanumant Borate, MSEE Student, Sept. 2012 – Dec. 2013.
4. Eric Dahlberg, MSEE Student, Sept. 2010 – May 2012.
5. Xiaofan Wu, MSEE Student, Sept. 2010 – May 2012.
6. Quresh Sutarwala, MSEE Student, Sept. 2010 – May 2012.
7. Harini Jambunathan, MSEE Student, Sept. 2009 – May 2011.
8. Meng Wang, MSEE Student, Sept. 2006 – Oct. 2010.
9. Jicheng Xia, MSEE Student, Sept. 2006 – Oct. 2010.
10. Matt Oehrlein, MSEE Student, Sept. 2008 – July 2010.
11. Sri Dhanush Kakara, MSEE Student, Sept. 2008 – May 2010.

Post-doctoral Fellows Supervised

University of Southern California

1. Dr. Anubhav Dwivedi, Aug. 2020 – present.
Focus: *Transition to turbulence in hypersonic flows*
2. Dr. Gokul Hariharan, April 2020 – Dec. 2020.
Now: *Research Assistant, Iowa State University.*
3. Dr. Armin Zare, Feb. 2017 – July 2019.
Now: *Assistant Professor, Mechanical Engineering, University of Texas, Dallas.*

University of Minnesota

4. Dr. Fu Lin, Jan. 2013 – Aug. 2013.
Now: *Senior Research Engineer, Systems Department, United Technologies Research Center.*
5. Dr. Makan Fardad, Aug. 2006 – June 2008.
Now: *Associate Professor, Electrical Engineering and Computer Science, Syracuse University.*

Undergraduate Student Activities

Research Experience for Undergraduates Advising

1. Tianchen Ji, Xi'an Jiaotong University, Shaanxi, China, Summer 2018.
2. Sergio Castro, University of Minnesota, Summer 2015.
3. Thanh Phuc Huynh, University of Minnesota, Fall 2013.
4. David Zoltowski, Michigan State University, Summer 2013.

5. Jingyuan Miao, University of Minnesota, Summer 2011.
6. Jared Sieling, Gustavus Adolphus College, Summer 2007.

Undergraduate Honors Projects Directed

1. Jacob Nordman, Sept. 2015 – May 2016.
2. Tor Anderson, Sept. 2014 – May 2015.
3. Victor Purba, Sept. 2013 – May 2014.
4. Thanh Phuc Huynh, Sept. 2012 – May 2013.
5. Jingyuan Miao, Sept. 2011 – May 2012.
6. Brett Paulsen, Sept. 2010 – May 2011.
7. Eric Dahlberg, Sept. 2009 – May 2010.

Visiting Scholars Hosted

1. Katie Fitch, PhD Student, Princeton University, Oct. 27 – 31, 2015.
2. Marcello Colombino, PhD Student, ETH Zürich, Oct. 1 – Nov. 26, 2015.
3. Nikolai Matni, PhD Student, Caltech, Oct. 4 – 10, 2014.
4. Prof. Peter J. Schmid, Laboratoire d'Hydrodynamique (LadHyX), Ecole Polytechnique, France, Aug. 25 – 28, 2013.
5. Prof. Luca Brandt, Royal Institute of Technology, Sweden, Jan. 27 – Feb. 3, 2009.

Awards, Honors, and Recognition of my Students and Postdocs

Makan Fardad

- National Science Foundation CAREER Award, 2018.

Rashad Moarref

- Invited Participant, Center for Turbulence Research Summer Program, Stanford University, 2010.
- Best Presentation in Session Award, American Control Conference, Baltimore, MD, 2010.
- Student Participation Grant Award, NSF-CMMI Research and Innovation Conference, Atlanta, GA, 2010.
- Finalist, Best Student Paper Award, American Control Conference, New York City, NY, 2007.
- 3M Science and Technology Fellowship, 2007.
- Graduate Fellowship, Electrical and Computer Engineering, University of Minnesota, 2007.

Fu Lin

- Travel Scholarship, Electrical and Computer Engineering, University of Minnesota, 2010.

Binh Lieu

- Doctoral Dissertation Fellowship, University of Minnesota, 2011 – 2012.
- Finalist, Minnesota Architectural Foundation Thomas F. Ellerbe Scholarship, 2012.
- Invited Participant, Center for Turbulence Research Summer Program, Stanford University, 2012.

- Fellowship, E-CAero Workshop on “Fast Methods in Scientific Computing”, Montestigliano, Italy, 2012.
- Travel Scholarship, Electrical and Computer Engineering, University of Minnesota, 2012.
- Travel Scholarship, University of Minnesota College of Community Scholars, 2011.
- Finalist, Best Poster Presentation Award, Minnesota Supercomputing Institute 25th Anniversary Research Exhibition, 2010.

Neil Dhingra

- Best Presentation in Session Award, American Control Conference, Boston, MA, 2016.
- Doctoral Dissertation Fellowship, University of Minnesota, 2015 – 2016.
- MnDRIVE Outreach Fellowship, University of Minnesota, 2014.
- Harriet G. Jenkins Pre-Doctoral Fellowship, NASA, 2011 – 2014.

Armin Zare

- Doctoral Dissertation Fellowship, University of Minnesota, 2015 – 2016.
- Travel Scholarship, 2015 Research School on Fluid Dynamics: Topics in Turbulence, Burgers Program for Fluid Dynamics, University of Maryland, 2015.
- Invited Participant, Center for Turbulence Research Summer Program, Stanford University, 2014, 2016.
- Finalist, Best Student Paper Award, American Control Conference, Portland, OR, 2014.
- Travel Scholarship, Electrical and Computer Engineering, University of Minnesota, 2012.
- Graduate Fellowship, Electrical and Computer Engineering, University of Minnesota, 2010.

Xiaofan Wu

- Thomas Edison Patent Award, Research and Development Council of New Jersey, 2021.
- Travel Scholarship, Los Alamos National Laboratory’s Grid Science Winter School and Conference, 2015.

Sepideh Hassan-Moghaddam

- Rising Stars in EECS, 2018.
- Ming Hsieh Institute PhD Scholar, 2018-2019.
- 3M Science and Technology Fellowship, 2013.

Hesameddin Mohammadi

- Ming Hsieh Institute PhD Scholar, 2020-2021.

David Zoltowski

- The Churchill Scholarship, 2015.
- The Barry Goldwater Scholarship, 2014.

Professional Service Activities

Guest Editor

Special Issue on Analysis, Control and Optimization of Energy System Networks 2018 – 2019
IEEE Transactions on Control of Network Systems

Associate Editor

IEEE Transactions on Control of Network Systems 2017 – 2020
SIAM Journal on Control and Optimization 2014 – 2017
22nd IFAC World Congress 2023
21st IFAC World Congress 2020
Conference Editorial Board, IEEE Control Systems Society 2006 – 2010

Associate Editor at Large

American Control Conference 2019

External Affairs Committee Chair

American Physical Society, Division of Fluid Dynamics Jan. 2017 – Jan. 2018

External Affairs Committee Vice Chair

American Physical Society, Division of Fluid Dynamics Jan. 2016 – Jan. 2017

External Affairs Committee Member

American Physical Society, Division of Fluid Dynamics Jan. 2015 – Jan. 2019

Technical Committee Member

Committee on Distributed Parameter Systems, IEEE Control Systems Society July 2012 – present

Steering Committee Member

Center for Turbulence Research, Stanford University Jan. – July 2012

Organizing Committee Member

22nd International Symposium on Mathematical Theory of Networks and Systems, 2016
62nd Annual Meeting of the American Physical Society, Division of Fluid Dynamics, 2009

Program Vice-Chair

55th IEEE Conference on Decision and Control, 2016

Program Committee Member

62nd IEEE Conference on Decision and Control, 2023
1st International Conference on Mathematical Modelling in Mechanics and Engineering, 2022
59th IEEE Conference on Decision and Control, 2020
57th IEEE Conference on Decision and Control, 2018

5th Midwest Workshop on Control and Game Theory, 2016
4th Midwest Workshop on Control and Game Theory, 2015
53rd IEEE Conference on Decision and Control, 2014
2010 American Control Conference
2009 Workshop on Control over Communication Channels
2008 American Control Conference
2008 IEEE International Conference on Control Applications
2006 IEEE International Conference on Robotics and Automation
13th Mediterranean Conference on Control and Automation, 2005

Extramural Team Review Member

Graduate Program, Department of Mechanical Engineering, University of California, Riverside, Feb. 2022.

Workshop Organizer

36th Southern California Control Workshop, University of Southern California, Los Angeles, CA, May 2019. (jointly with Ashutosh Nayyar and Ketan Savla; workshop web page: <http://csc.usc.edu/socal/s19/>)

Control, Estimation, and Optimization of Interconnected Systems: From Theory to Industrial Applications, joint 44th IEEE Conference on Decision and Control & European Control Conference, Seville, Spain, Dec. 2005. (jointly with Cedric Langbort; workshop web page: www.umn.edu/~mihailo/cdc-ecc05.html)

CDC Soccer Cup Organizer

58th IEEE Conference on Decision and Control, 2nd CDC Soccer Cup, Nice, France, December 2019. (jointly with Jorge Cortes and Magnus Egerstedt)

57th IEEE Conference on Decision and Control, Inaugural CDC Soccer Cup, Miami Beach, FL, December 2018. (jointly with Jorge Cortes and Magnus Egerstedt)

Panelist

NSF Dynamics, Control and Systems Diagnostics Panel, 2022.

NSF Civil, Mechanical and Manufacturing Innovation Panel, 2021.

NSF Cyber-Physical Systems Panel, 2019.

NSF Energy, Power, Control, and Networks Panel, 2018.

NSF Civil, Mechanical and Manufacturing Innovation Panel, 2016.

NSF Civil, Mechanical and Manufacturing Innovation Panel, 2014.

NSF Energy, Power and Adaptive Systems Panel, 2013.

NSF Civil, Mechanical and Manufacturing Innovation Panel, 2011.

NSF Cyber-Physical Systems Panel, 2010.

NSF Civil, Mechanical and Manufacturing Innovation Panel, 2009.

NSF Emerging Frontiers in Research and Innovation Panel, 2009.

IEEE International Workshop on Signal Processing Advances in Wireless Communications.

Competition Judge

Student Poster Competition, General/Stability Category, 65th Annual Meeting of the American Physical Society Division of Fluid Dynamics, 2012

Conference Session Chair

"Linear Systems II", 60th IEEE Conference on Decision and Control, 2021

"CFD: Data-driven Methods", 72nd Annual Meeting of the American Physical Society Division of Fluid Dynamics, 2019

"Optimization Algorithms II", 2019 American Control Conference

"Optimization III", 2018 American Control Conference

"Optimization", 2017 Information Theory and Applications Workshop

"Network Analysis and Control II", 54rd IEEE Conference on Decision and Control, 2015

"Optimization Algorithms II", 2015 American Control Conference

"Flow Control – General", 67th Annual Meeting of the American Physical Society Division of Fluid Dynamics, 2014

"Optimization III", 52th IEEE Conference on Decision and Control, 2013

"Optimization I", 51th IEEE Conference on Decision and Control, 2012

"Control Applications II", 51th IEEE Conference on Decision and Control, 2012

"Turbulent Boundary Layers III: Theory", 65th Annual Meeting of the American Physical Society Division of Fluid Dynamics, 2012

"Optimal Control I", 2012 American Control Conference

"Optimal Control IV", 2011 American Control Conference

"Distributed Parameter Systems II", 2010 American Control Conference

"Estimation and Control of Distributed Parameter Systems II", 2010 American Control Conference

"Nanopositioning", 2009 American Control Conference

"Optimization Theory and Applications", 2008 American Control Conference

"Distributed Parameter Systems IV", 43rd IEEE Conference on Decision and Control, 2004

Conference Session Co-chair

"Optimization II", 2022 American Control Conference

"Estimation II", 2021 American Control Conference

"Optimization Algorithms IV", 57th IEEE Conference on Decision and Control, 2018

"Modeling and Control of Power Flow for Transient Thermal Systems", Semi-plenary Session, 55th IEEE Conference on Decision and Control, 2016

- "Smart Cities As Cyber-Social-Physical Systems", Semi-plenary Session, 55th IEEE Conference on Decision and Control, 2016
- "Power Networks and Systems", 2016 American Control Conference
- "Optimal Control III", 2015 American Control Conference
- "Topics in Decentralized and Distributed Control", 53rd IEEE Conference on Decision and Control, 2014
- "Power Network Dynamics and Control", 21st International Symposium on Mathematical Theory of Network and Systems, 2014
- "Optimization I", 52th IEEE Conference on Decision and Control, 2013
- "Optimization II", 2013 American Control Conference
- "Distributed Parameter Systems", 2012 American Control Conference
- "Agents and autonomous systems IV", 50th IEEE Conference on Decision and Control, 2011
- "Model reduction and control of distributed process systems", 2006 American Control Conference
- "Distributed parameter systems III", 2006 American Control Conference
- "Control and Optimization of Distributed Processes", 2005 American Control Conference
- "Distributed Parameter Systems III", 42nd IEEE Conference on Decision and Control, 2003

University Service Activities

Leadership Positions at the University of Southern California

Founding Director of the Center for Systems and Control. Viterbi School of Engineering, University of Southern California, Jan. 2017 - present.

Member of the MHI Advisory Council. Ming Hsieh Institute, Viterbi School of Engineering, University of Southern California, Jan. 2018 - present.

Chair of the Faculty Recruiting Subcommittee. Ming Hsieh Department of Electrical Engineering, University of Southern California, Spring 2018.

Member of the Appointments, Promotions, and Tenure Executive Committee. Viterbi School of Engineering, University of Southern California, Aug. 2017 - Aug. 2018.

Committees at the University of Southern California

Research Committee. Viterbi School of Engineering, University of Southern California, Aug. 2019 - Aug. 2020.

Faculty Recruiting Committee. Ming Hsieh Department of Electrical and Computer Engineering, University of Southern California, Spring 2020.

Appointments, Promotions, and Tenure Committee. Viterbi School of Engineering, University of Southern California, Aug. 2017 - Aug. 2019.

Merit Review Committee (Research). Ming Hsieh Department of Electrical and Computer Engineering, University of Southern California, Spring 2019.

Committee for Selection of MHI PhD Scholars. Ming Hsieh Institute, University of Southern California, Sept. 2017, Oct. 2022.

Academic Progress Review Committee. Ming Hsieh Department of Electrical Engineering, University of Southern California, Spring 2017.

Fellowship Committee. Ming Hsieh Department of Electrical Engineering, University of Southern California, Jan. 2017.

Seminar Organizer at the University of Southern California

Center for Systems and Control Seminar Series Aug. 2017 – present.
<http://csc.usc.edu/seminars/>

Leadership Positions at the University of Minnesota

Chair of the Faculty Recruiting Committee. Department of Electrical and Computer Engineering, University of Minnesota, Aug. 2013 - Aug. 2014.

Director of Graduate Studies. PhD Program in Control Science and Dynamical Systems, University of Minnesota, Aug. 2009 – Jan. 2017.

Committees at the University of Minnesota

Advisory Committee. Minnesota Discovery, Research and Innovation Economy (MnDRIVE) Initiative, College of Science and Engineering, University of Minnesota, Sept. 2013 - Jan. 2017.

Faculty Recruiting Committee. Department of Electrical and Computer Engineering, University of Minnesota, Aug. 2015 - Aug. 2016.

Postdoctoral Search Committee. Institute for Mathematics and its Applications, Jan. 2015.

Doctoral Fellowship Committee. University of Minnesota Informatics Institute, Fall 2014.

Faculty Recruiting Committee. Minnesota Discovery, Research and Innovation Economy (MnDRIVE) Initiative, College of Science and Engineering, University of Minnesota, Sept. 2013 - Aug. 2014.

Research Associate Recruiting Committee. Digital Technology Center, University of Minnesota, Oct. 2013 - Aug. 2014.

Post-Tenure Review Committee. Department of Electrical and Computer Engineering, University of Minnesota, Sept. 2013 - Jan. 2017.

Faculty Recruiting Committee. Department of Electrical and Computer Engineering, University of Minnesota, Aug. 2011 - Aug. 2013.

Graduate Committee. Department of Electrical and Computer Engineering, University of Minnesota, Sept. 2006 - Aug. 2011.

Consultative Committee. Department of Electrical and Computer Engineering, University of Minnesota, Sept. 2007 - Aug. 2008; Sept. 2010 - Aug. 2011; Sept. 2011 - Aug. 2012.

Seminar Coordinator at the University of Minnesota

MnDRIVE Seminar Series in Control and Robotics

Jan. 2014 – Jan. 2017.

<http://www.ece.umn.edu/users/mihailo/seminars/>

Control Science and Dynamical Systems Center Seminar Series

Sept. 2005 – Jan. 2017.

(jointly with Murti Salapaka, since Sept. 2008)

Grants and Contracts

- "Low-complexity stochastic modeling and control of turbulent flows", *Air Force Office of Scientific Research*, June 15, 2018 – June 14, 2022, PI, \$577,009.
- "The proximal augmented Lagrangian method for distributed and embedded nonsmooth composite optimization", *National Science Foundation*, Aug. 15, 2018 – July 31, 2022, PI, \$360,000.
- "Distributionally robust control and incentives with safety and risk constraints", *National Science Foundation*, March 15, 2019 – July 31, 2022, PI, \$318,910.
- "The effect of random roughness on turbulent boundary layers, from first principles", *Office of Naval Research*, Jan. 1, 2017 – Dec. 31, 2021, Co-PI, (Krishnan Mahesh, PI), \$908,751.
- "CPS-Synergy – Collaborative research: Dynamic methods of traffic control that impact quality of life in smart cities", *National Science Foundation*, Sept. 15, 2015 – Aug. 31, 2020, Co-PI, (Nikolaos Papanikolopoulos, PI; Brian Scott, John Hourdos, and Stephen Guy, Co-PIs), \$1.2M.
- "Collaborative research: The onset of turbulence in viscoelastic wall-bounded shear flows", *National Science Foundation*, June 15, 2015 – May 31, 2020, PI (Satish Kumar, Co-PI; collaborative research with Johns Hopkins University), \$209,988.
- "Theory and techniques for modeling and control of turbulent shear flows", *Air Force Office of Scientific Research*, Nov. 1, 2015 – Oct. 31, 2019, PI, \$449,945.
- "Sparsity-promoting optimal design of large-scale networks of dynamical systems", *National Science Foundation*, Aug. 15, 2014 – July 31, 2018, PI, \$389,673.
- "Low-complexity stochastic modeling and control of turbulent shear flows", *National Science Foundation*, Aug. 1, 2014 – July 31, 2018, PI (Tryphon Georgiou, Co-PI), \$320,000.
- "Analysis and simulations of the structure and dynamics of transitional shock/boundary layer interactions", *Office of Naval Research*, June 1, 2015 – May 31, 2018, Co-PI, (Graham Candler, PI; Joseph W. Nichols, Co-PI), \$1.063M.
- "Low-complexity stochastic modeling of turbulent flows: coping with big data sets in strongly-coupled dynamical systems", *University of Minnesota Informatics Institute Transdisciplinary Faculty Fellowship*, July 1, 2014 – June 30, 2016, PI, \$75,000.
- "Collaborative Research: Algorithms for design of structured distributed controllers with application to large-scale vehicular formations", *National Science Foundation*, Aug. 15, 2009 – July 31, 2013, PI, \$325,000.
- "CAREER: Enabling methods for modeling and control of transitional and turbulent wall-bounded shear flows", *National Science Foundation*, Mar. 1, 2007 – Feb. 28, 2013, PI, \$400,000.
- "MnDRIVE Seminar Series in Control and Robotics", *University of Minnesota*, Feb. 1, 2014 – Jan. 30, 2016, \$30,000.

- "Improving efficiency of wind turbines by means of model-based flow control", *University of Minnesota Initiative for Renewable Energy and the Environment*, July 1, 2010 – June 30, 2013, PI, \$135,000.
- "An industry/academe consortium for achieving 20% energy from wind by 2030 through cutting-edge research and workforce training", *Department of Energy*, Feb. 1, 2010 – Dec. 31, 2012, Co-PI, \$7.9M.
- "Institute on the Environment Resident Fellowship", *University of Minnesota*, Aug. 2012, PI, \$10,000.
- "Optimization of algal lipid production for human nutrition and bioenergy", *University of Minnesota Futures Grant Program*, July 1, 2009 – June 30, 2011, Co-PI, \$200,000.
- "Advancing transportation research via sensing, control, and visualization", *University of Minnesota Center for Transportation Studies*, Co-PI, March 1, 2011 – June 30, 2011, \$25,000.
- "Transition to elastic turbulence with application to mixing enhancement in microfluidic devices", *University of Minnesota Digital Technology Center*, July 1, 2009 – June 30, 2010, PI, \$61,657.
- "Design of scalable control strategies for large-scale automated highways", *University of Minnesota Grant-in-Aid Program*, Jan. 1, 2009 – June 30, 2010, PI, \$29,346.
- "Model-based sensorless flow control", *University of Minnesota Grant-in-Aid Program*, Jan. 1, 2006 – June 30, 2007, PI, \$23,083.
