

# Greg Ver Steeg

University of Southern California  
Information Sciences Institute  
4676 Admiralty Way, Ste 1001  
Marina del Rey, CA 90292

Phone: (626) 840-5901  
Email: [gregv@isi.edu](mailto:gregv@isi.edu)  
Homepage: <http://www.isi.edu/~gregv>

## Biographical sketch

Dr. Ver Steeg's research explores *practical methods for inferring meaningful structure in complex systems*. This work draws on a diverse set of connections between information theory, machine learning, causal inference, and physics. His recent work has applied these tools to solving outstanding problems in diverse domains including biology, natural language, human behavior, and social networks.

## Education

Ph.D., California Institute of Technology 2009  
Field: Physics, Area: Quantum Information and Computation  
Advisor: John Preskill, Feynman Professor of Theoretical Physics

B.S., Drake University 2003  
Majors: Physics, Mathematics, Philosophy

## Experience

University of Southern California  
Research Assistant Professor 2013 - Present  
Senior Research Lead 2018 - Present  
Research Lead 2015 - 2018  
Computer scientist 2011 - 2015  
Postdoctoral researcher 2009 - 2011

California Institute of Technology 2003-2009  
Graduate research

Summer internships  
Google Inc., Machine translation 2009  
Brookhaven National Laboratory, Nuclear physics 2002  
Los Alamos National Laboratory, Nuclear physics 2001

Drake University 2001-2003  
Computational atomic physics research

## Grants

Amazon Research Award, \$80k 2019

James H. Zumberge Research and Innovation Fund Award, \$85k 2017

DARPA Next Generation Social Science, ~ \$800k (PI) 2016-2019

DARPA Social Media in Strategic Communication grant, ~ \$6 million (co-PI) "Situational Awareness for Social Media: Theories, Models and Algorithms"	2012-2016
AFOSR Young Investigator Award, \$360k (PI) "Bell Inequalities for Complex Networks"	2012-2015
Army Research Office, \$645k "Optimization via Open System Quantum Annealing"	2012-2015

## Awards

ISI Institute Achievement Award	2018
IJCAI Early Career Spotlight	2017
AFOSR Young Investigator Award	2012-2015
Best paper runner-up at UAI	2011
National Science Foundation Graduate Research Fellowship	2005-2008
California Institute of Technology Richard Feynman Fellowship	2003
Barry Goldwater Scholarship	2002
Drake University Physics Scholarship	1999-2003

## Teaching and mentoring

### Primary advisor

David Kale, PhD (now a researcher at Netflix)	2018
Daniel Moyer	Expected graduation 2019

### Co-advisor

Shuyang Gao, PhD (now a researcher at Amazon)	2018
Serban Stan	
Neal Lawton	
Robert Brekelmans	
Kyle Reing	
Hrayr Harutyunyan	

Interns: Ryan Gallagher, Samuel Thomas

M.S. students: Eswar Lakshminarayanan, Gaurav Bose, Kusha Murthy, Hariprasad Ravishankar, Hyunjun Choi

### Teaching

CSCI-590: Directed research, USC	2014-2018
CSCI-599: Physics and Computation, USC Designed and taught with A. Galstyan, two class projects led to publications.	Spring 2012
T.A. Physics 2, California Institute of Technology	2008

## Service

Open source code contributions:

<b>Github stats:</b> 9 public repositories with over 500 “stars” and over 100 “forks”	
Linear factor models and covariance estimation with Linear CorEx <a href="https://github.com/gregversteeg/linearcorex">https://github.com/gregversteeg/linearcorex</a>	2017
Nonlinear CorEx models optimized for under-sampled, high-d biomedical data. <a href="https://github.com/gregversteeg/bio_corex">https://github.com/gregversteeg/bio_corex</a>	2017
Constructing topic models with CorEx <a href="https://github.com/gregversteeg/corex_topic">https://github.com/gregversteeg/corex_topic</a>	2016

Note: these papers span different disciplines including physics, computer science, and biology. Listed are all peer-reviewed publications including journal articles and conference proceedings. In physics, conferences typically do not have papers (only abstracts, not included here). Peer reviewed conference proceedings in CS and biology are included. In CS, conference proceedings are, depending on the conference, highly selective and considered top venues in the field (e.g., NIPS, ICML, WWW). Journals in CS are typically used for longer version of work appearing originally in conferences. In biology (neuroscience at least), conference papers are peer reviewed, but they are short and generally regarded as second tier publications mainly used for work in progress.
