

## **Lemelson Foundation**

The Lemelson Foundation uses the power of invention to improve lives, by inspiring and enabling the next generation of inventors and invention-based enterprises to promote economic growth in the US, and social and economic progress for the poor in developing countries. The Foundation believes the most important products invented in the next 20 years will be those that address critical social and environmental issues, and reach and serve communities with the greatest needs. However, if your organization's work is consistent with the Foundation's strategic goals and the project or program fits within the opportunity criteria, you may submit a preliminary 1-page concept note to [concepts@lemelson.org](mailto:concepts@lemelson.org) as a means of letting Program staff learn about your activities.

Viterbi faculty interested in applying for a grant from a foundation with the help of the Viterbi School should contact Maria G. Zamora at [mgzamora@usc.edu](mailto:mgzamora@usc.edu), Viterbi Corporate & Foundation Relations.
