We’re people from different backgrounds moving toward one destination: global security. On our team, you’ll discover that diversity is more than a written policy: we live and breathe it. Our mission of global security unites people of different cultures, experiences, ideas, genders, and work styles. We’ll support you through training and employee resource groups, which strengthen skills and understanding.

We have a long history of drawing strength from our differences. In fact, DiversityInc has named us one of the Top 50 Companies for Diversity—an honor we’ve proudly held since 2010, when we were the first defense company to make the list.

Across our career areas and around the globe, we see the value of our performance every day. We are Northrop Grumman. And freedom is at the heart of what we do.

We need talented candidates to help us achieve our goal. If you want to use electrical engineering, computer engineering and computer science skills to keep the world safe, let’s talk.
